THIS IS UNEVALUATED INFORMATION

25X1

The production quota for brown coal low-temperature tar was 58,100 tons in 1948; 65,100 tons in 1950; and is 64,100 tons for 1951. It showed an increase of 14 percent from 1949 to 1950. However, it has been slightly reduced for 1951, apparently because the 1949 production plant could be fulfilled 98 percent only. The planned figures can presumably be reached.
